### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

Claims 1-2 are under examination on the merits.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1part (b) is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "stringent conditions" in claim 1 is unclear. In page 5 of the disclosure applicant has provided some examples for "highly stringent conditions" and has defined the term "moderately stringent conditions". However, no specific definition for "stringent conditions" can be found. In the absence of a clear definition for said term one of skill in the art does not know what salt and temperature conditions to use to prepare claimed molecules. Applicant may overcome this rejection by recitation of specific salt and temperature conditions used for hybridization, into claim 1(b), based on the support provided in the disclosure.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 1652

Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Wei et al. (U.S. Patent No. 6,534,299, issued 3.18/03). Wei teaches an isolated nucleic acid molecule that encodes SEQ ID NO:2 of this invention completely (see the attached sequence alignment) and can hybridize to SEQ ID O:1 of this invention, under "stringent conditions", anticipating claims 1-2.

**No claims are allowed.**
